

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

1. (Original) An electron-emitting fabric comprising: First linear bodies having a conductive layer covered with an insulating layer; and second linear bodies formed of a conductive material, the first linear bodies and the second linear bodies being crossed.

2. (Original) The electron-emitting woven fabric according to claim 1, wherein a carbonaceous material is provided on a surface of cross parts of the second linear bodies crossing the first linear bodies at lifted portions and/or sunk portions of the first linear bodies.

3. (Original) The electron-emitting woven fabric according to claim 2, wherein the carbonaceous material is one or more selected from a group consisting of a carbon nanotube, diamond-like carbon and fullerenes.

4. (Currently Amended) The electron-emitting woven fabric according to ~~one of claims 1 to 3~~ claim 1, wherein the conductive layer comprises a conductive polymer.

5. (Original) The electron-emitting woven fabric according to claim 4, wherein the fullerenes are added in the conductive polymer.

6. (Currently Amended) The electron-emitting woven fabric according to ~~one of claims 1 to 5~~ claim 1, wherein a diameter of each of the first linear body and the second linear body is not greater than 1 mm.

7. (Original) The electron-emitting woven fabric according to claim 6, wherein the diameter of the second linear body is $\frac{1}{2}$ or below of the diameter of the first linear body.

8. (Original) A display device comprising: an electron-emitting woven fabric defined in ~~one of claims 1 to 7~~ claim 1; and a light-emitting portion provided to face an electron-emitting direction of the woven fabric.
